

Get *Fired Up* to Teach Science the Hands-on Way!

The California Department of Forestry and Fire Protection, California Community Forests Foundation with support from the Bureau of Land Management, California Regional Environmental Education Community (CREEC), Inyo County Office of Education, Mono County Office of Education present:

Connecting Science, Technology & The Local Environment

A Project Learning Tree & "Burning Issues" Workshop For 5th – 12th Grade Teachers

The workshop will include a field trip, presentations by local resource managers, hands-on exploration of the Burning Issues CD-ROM, and experience lessons from a variety of PLT curriculum materials.

Learn:

- ❖ to address science standards through engaging, interdisciplinary, hands-on activities
- ❖ about Sierra Nevada and Great Basin forest ecology, fire ecology and fire management practices

- ❖ to spark students' interest through investigating their own environment
- ❖ to use technology to support an inquiry approach to teaching science

Get:

- ❖ a variety of PLT curriculum modules and support materials
- ❖ Burning Issues CD-ROMs
- ❖ Lodging and meals
